June 2011

CLEAN GET AWAY

Patients have been getting away with very clean and shining teeth after seeing our new Hygienist Joanne!

HIGH TEST

Doc has been trying 24K energy drink from Reliv to keep him charged up ...more energy - whose idea was that?

GONE FISHING

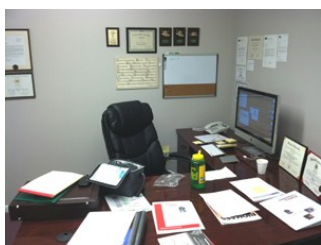

We will be closed for vacation from 7/4/11 until 7/12/11.

GUYS IN THE CORNER

Colin has successfully completed another semester at RIT while Sean is finishing up at Scribner road elementary.

This summer Sean will be swimmin' and chillin'. Doc hopes to get Colin in the office to help with scanning jobs. Speaking of jobs ...

Brien is in Plattsburg working at Plattco. Now that desk is a sign of a hard worker ... just like his Dad!

KNOWLEDGE IS POWER

Congratulations to all of our graduating seniors (like Alexandra Bekisz)! Doc always says that *'hard work pays off'* and remember how hard you worked to get to this point as you accept your diploma. You make us all proud. Face your new challenges in life with determination, confidence and a big smile (after all this is a Dental Newsletter).

PRACTICING WHAT HE PREACHES

You can never know too much or be too good at something. Over the past 5 years we have become very proficient with our CEREC technology in creating fabulous all ceramic restorations to replace missing and damaged tooth structure ... in a single appointment. Well this takes time effort and constant reeducation. Dr O'Keefe will be attending another course by Dr Robert Conrad 6/16 - 6/18 to advance his knowledge. Doc will always be prepared!

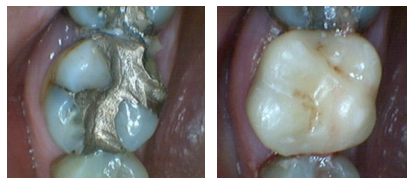

Whether we need to replace a failed older restoration back to proper form and function.

Repairing a broken cusp.

Or saving your smile before a big event!

DOC JUST PREACHIN'

The Girl Scouts of troop 60051 visited last month to learn about dental treatments. Doc showed off our office and told a few stories ... maybe they earned a *tolerance* merit badge too!

A TRIP TO DENTALTOWN

Dr O'Keefe has had an article published in the April 2011 issue of Dental Town. The article "Using a Reliable, Quick, Aesthetic Bisacryl for Provisional Restorations" was written to teach other dentists a method to make comfortable, pretty temporary crowns (in case you didn't speak *dentalese*). Doc is very proud, feel free to check it out - he has several extra copies in the office.

UNIVERSALLY GREAT

Smiles all around for Doc, Arlette and Sean during their great vacation at Universal Studios (even more fun than flossing). Every day was hot and sunny, the rides and attractions were tremendous with wild roller coasters (that Arlette and Sean rode while Doc waved), spinney things (for Sean to ride while Doc and Arlette waved) and 3D spectacular rides.

Of course the highlight of the trip was the Wizarding World of Harry Potter! The Castle was breathtaking, the butterbeer delish, and the shops magical. Look at the 3 new Hogwarts students in their robes. Isn't green to Slytherin?
