A BIT GAMEY

Last month we had a staff game night at Kathy's. What a night! Doc wasn't caught cheating once! We learned that Chris doesn't follow rules, that none of us can draw anything other than teeth and ... how much fun we have together ... but you already knew that!

DINOSAUR BRIEN

Brien is having his 22nd birthday this month, but we didn't mean he was a dinosaur (unlike his dad). It's just that Brien is too busy at Clarkson to come home, so Doc, Arlette, Colin and Sean are meeting Brien in Syracuse at the Dinosaur Barbeque!

GUYS IN THE CORNER

Brien and Colin will be enjoying a bit of time off from the college grind while on spring break this month. Maybe they can even visit their dad HINT HINT! Sean is channeling his Irish heritage and waiting for St. Patrick's Day. There is nothing like green teeth to show that your Irish! We hope Kathy doesn't see him before the Holiday!

Time for a bit o scrubin' for the teeth!!!

LATE EDITION

This month of March seemed to come in like a lamb ... but quickly turned into a huge raging beast ... and I'm not lion! We were short staffed for quite a while ... which is a great excuse for Doc not getting this newsletter out on time. So this is the late edition.

BETTER LATE THAN NEVER

OUR WEB SITE IS DONE! Well actually it is mostly done ... but you are able to view it (and use it as your internet Homepage!) to see our smiling faces. As a matter of fact this website is so coooool that you can tell your family, friends, and coworkers too!

Who would have thought that after a few short years it would finally be here. It is somewhat like finding the Holy Grail ... well in a Monty Python way. Dr. O'Keefe had more than a few writer's block moments ... and of course which pictures to use ... then 'can we really say that' came up a bit too. Now it is all water under the bridge or partial or denture ... *whatever!*

Ed the computer guy(genius), took Doc's ideas, photos and text to create this visual masterpiece through some form of technical wizardry. Now you can see the video that we shot last year, view some candid photos of us, and of course read about and see the fabulous dental treatments we have done. We will even keep recent Newsletters available for viewing.

The site is www.DrOKeefefilling-you-in.com

AT THE END OF THE RAINBOW

Every good Irishman knows that you find a pot-o-gold at the end of the rainbow ...but we helped someone find something more ... a beautiful, functional CEREC crown!

Doc and Chris removed the worn, broken down amalgam filling that had obviously seen better days along with a substantial amount of decay... and designed, milled and bonded a well fitting natural looking crown that our patient can comfortably enjoy for years.

Now our patient's Irish eyes aren't the only things smilin'!
